

# JUAN AGUSTÍN TIBALDO

## personal information

**Full name:** Juan Agustin Tibaldo

**Date of birth:** 30 - 09 - 1990

**Address:** Van Walbeekstraat 103-2,  
1058cn Amsterdam, Netherlands.

**E-mail:** tino@ohzi.io

**Phone number :** +31 6 85275567

**Skype ID:** agustintibaldo

**Upwork profile:**

<https://www.upwork.com/fl/juanagustint>  
TOP Rated 100% Job Success

### Education

**Master in Science on  
Computer Science: Big Data  
Engineering, VU/UvA  
Amsterdam, Netherlands,  
2019-2021**

Degree in Software Engineering &  
Computer Science 2011-2017, UNLP,  
ARGENTINA. **Thesis:** Opinion mining  
and sentiment analysis over the social  
media and possible use in marketing  
(**March 2017**) **grades average** 8.29

### Languages

**English:** fluent (CAE B, 199 2017)

Spanish: native

Chinese: intermediate (HSK3, HSKK1)

Swedish: basic

## main skills

THREE.JS  
WEBGL  
SHADERS  
JAVASCRIPT  
HTML5  
BabylonJS

## additional skills

R, node, blender, data mining,  
data scraping, socket.io, HPC,  
CUDA, optimization,  
Object-oriented programming, git

# hobbies and Interests

Photography: landscapes, portraits, architecture, long exposition.  
<https://500px.com/tinotibaldo>

Traveling : **China, Taiwan, Europe Patagonia, Scandinavia, UK.**

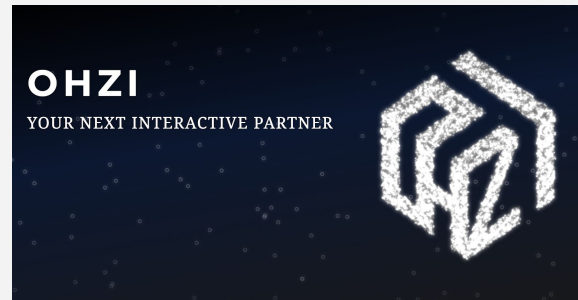

Drawing: **pen and pencil, ink**

Sailing, Cycling, Running

Poetry, music and novels

## Current position :

Director at OHZI interactive

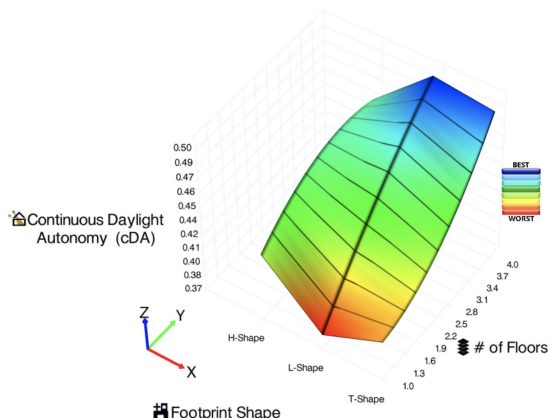

## About OHZI interactive:

OHZI INTERACTIVE provides interactive user interfaces to small-, medium- and large-sized companies. Our services includes UX design and software development focused on computer graphics on the web using the WebGL API.

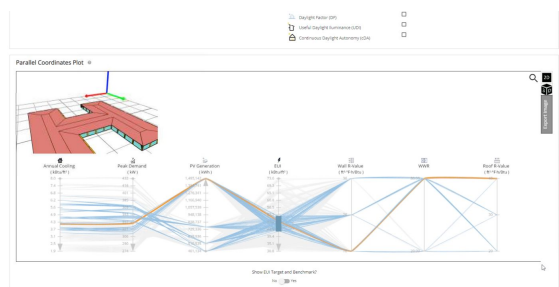

<https://ohzi.io>

## Perkins+Will - SPEED information visualizations

A Simulation Platform for Energy Efficient Design that will change the way architects and engineering do energy analysis over building designs. I developed a series of eight 3d information and data visualization tool.

Link not publicly available

## Eugenius landing page - Seattle

An innovative web experience that tells the story about Eugenius and the services they provide. It's an immersive trip through offices and server, were you are inside the ship.

<https://www.eugenius.com/experiential>

## Media Vision Group WebGL pathfinder - Sweden

One of the largest projects we worked at OHZI interactive. It's an interactive pathfinding tool completely build using WebGL + React GUI.

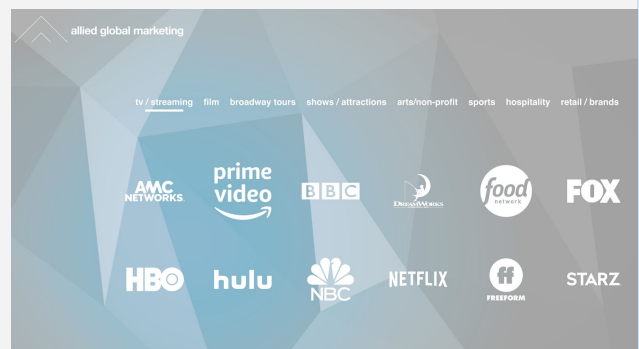

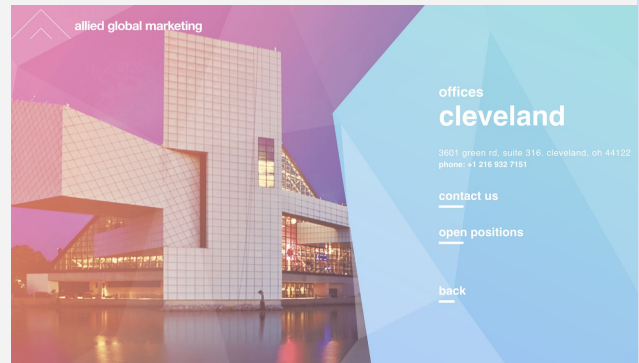

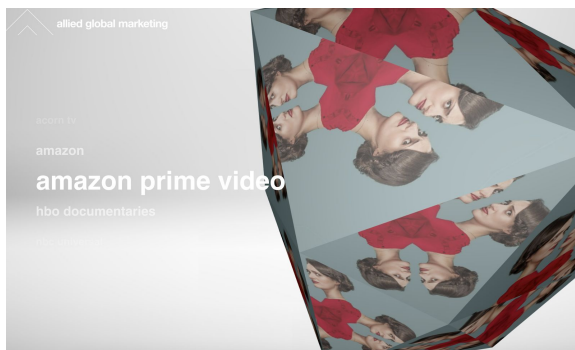

This tool allows users to find their store or space in a building, and get the right pathway to go there. The tool is flexible enough that has been used in hospitals and different shopping malls all around Scandinavia without major changes.

[www.mediavisiongroup.se/](http://www.mediavisiongroup.se/)

# Allied Global Marketing - USA

An innovative web experience that introduces the story of Allied Global Marketing. It's an exciting interactive experience where the AGM experience is told through a polygon that guides you into the different web sections.

<https://alliedglobalmarketing.com/>

# Voodoo Creative - Australia

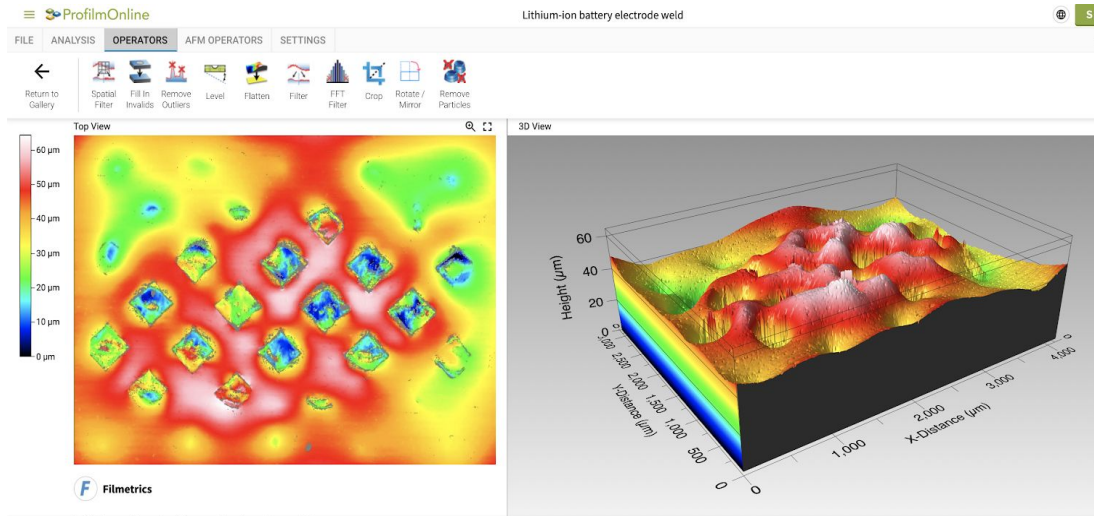

Particle animation that morphs into different shapes, including a physically-correct wave simulation, and bird flying simulation, where birds follows the user's input.

<https://particles.ohzi.io/>

# ProfilmOnline - US based engineering company

ProfilmOnline is an online viewer for microelectronic microscope image rendering and measumen. It lets you analyze on real time different features of the analyzed model and share it with colleagues, clients or contractors.

<https://www.profilmonline.com/>

## Sun power - global

A minimalistic 3d earth model with highlighted locations where Sun Power have facilities. Earth has a breath animation.

<https://tibaldo.neocities.org/sunpower/>

## Digitaldelivery - US

A small animation for the landing site of digitaldelivery.tech where you can see how Digitaldelivery delivers documents all across the USA

<http://digitaldelivery.tech/>

Experiment 6 - Reusable  
Branch modules user on sorting  
algorithm

Link under maintenance

Experiment 4 - Advance UI

Experimental advance UI with  
multiple visualizations and exploration  
tools for information.

<https://redbull.ohzi.io/>

## Experiment 7 - Unlimited light sources baked for THREEJS

A small project for baking multiple shadows into textures, as Threejs only permit 16 light sources into the same scene. This technique allows an unlimited amount of lights casting shadows. Once the shadows are baked into the textures, there's no need for rendering lights any more, which means no extra GPU.

## IOHK - distributed (UK, US, China, Japan)

Cascading disruption - the animation shows different states of a network. 2016

<https://iohk.io/>

3d Game of life - an animation that displays complex shapes generated by

pseudo-random interaction such in the game of life. 2016 <https://iohk.io/>

## Keeper Furniture - Estonia

A shelf customizer plugin for a furniture e-commerce website.

<https://tibaldo.neocities.org/shelf-customizator>

Featuring

YOUR  
PROJECT

here

;)

### Experiment 5 - Iconic chair

Using Photo Realistic Materials to create a realistic scene, by applying good textures and shaders.

<https://tibaldo.neocities.org/chair>  
(link under maintenance)

### Experiment 1 - GOLD

Golden particles that dances around the earth. Inspired by the rays of sun and electromagnetica particles that hits the earth everyday.

<https://tibaldo.neocities.org/fumafaso.html>

### GENI Design - USA -2016

3d globe with markers loaded on the fly

<https://tibaldo.neocities.org/dest.html>  
(link under maintenance)

### Experiment 2 - Reduris

Blue particles that fade away. When they move the combine between each other creating a network shape.

<https://tibaldo.neocities.org/reduris.html>

### Create My Case - UK

GoKart customization tool that enables changing color and textures of a go kart

<https://tibaldo.neocities.org/gokart.html>  
(link under maintenance)

## Experiment 3 - Landscape - 2016

Testing threejs lights and generative terrain. A fun a creative experience with different light sources and a randomly generated terrain.

<https://tibaldo.neocities.org/landscape.html>

## GCEL MEA - Lebanon - 2016

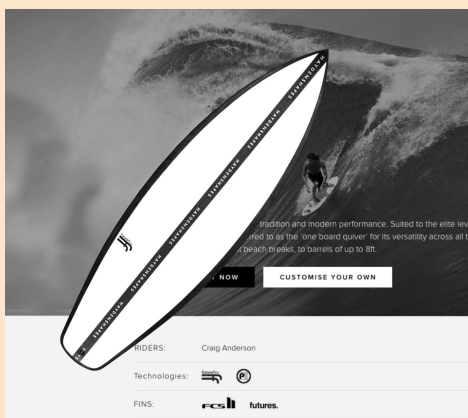

Interactive globe with images and videos of GCEL and their purpose.

No preview available

## Hayden Shapes - Australia

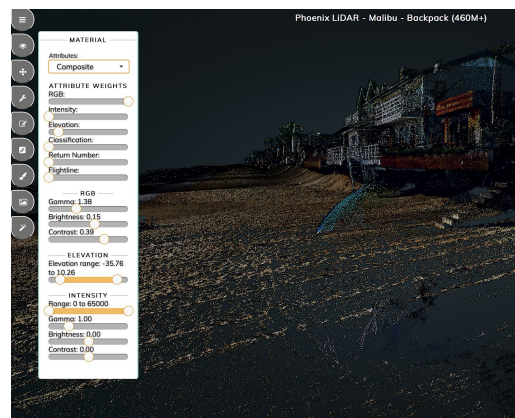

An automatic rotation system for 3d models displaying.

<https://www.haydenshapes.com/>

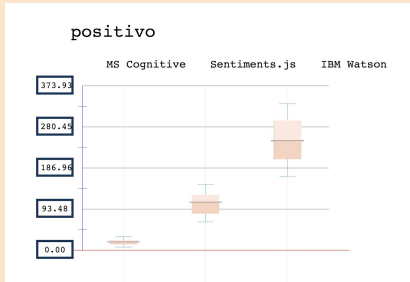

## PhoenixLidar - US

A CSS + javascript menu for a potree custom version made by PhoenixLidar

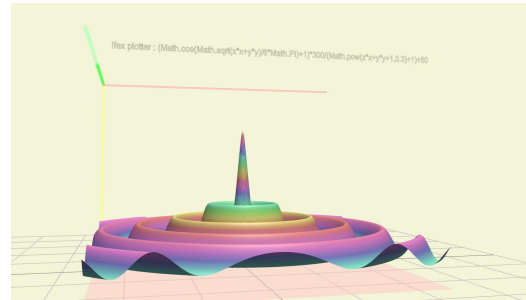

<https://www.phoenixlidar.com>

A small statistics tool for displaying whisker and box data used on my degree final thesis

<https://tibaldo.neocities.org/boxwhisker>

Ifex Function plotter

<https://tibaldo.neocities.org/plotter.html>

Redshire Boulevards Inc: - USA

3d words cloud

<https://tibaldo.neocities.org/wordcloud.html>

Head picker

<https://tibaldo.neocities.org/head-2.html>

Double globe with data

<https://tibaldo.neocities.org/globe.html>

Image picker

<https://tibaldo.neocities.org/vacaciones.html>

Sanjay Shah - UK - 2016

3d globe with interactive markers

<https://tibaldo.neocities.org/destination.html>

Onlinelib GmbH - Germany

360 viewer from cubemap 3x2 video - 2017

No preview

Treefrog - Canada

Background made of a moving background 2016

<https://tibaldo.neocities.org/index.html>

De Zhou witmoon software - China

- 2016

custom blue print3d - No preview

Mic's Lab Pty Ltd - **Australia** -

2016

Galaxy of color points and socket interactivity

<https://tibaldo.neocities.org/anim7.html>

ClosetPro Software - Shaders, material and lights improvements

2016

No preview

Veselin Dzhezhev - Austria

Dome viewer that automatically adapts to contain random

objects - 2016 No preview

Mohammad Ahmad-

Document transition for HTML. SVG to 3d mesh.

2016

<https://tibaldo.neocities.org/anim3.html>

Geopast - Australia

Data collection over Trove in Australia. The data were classified to see which postal mail had no copyright and could be used for printing and sealing.

2016

Project RZ - UK Data scraping over most popular real estate search engines in UK Zoopla and Rightmove. Data were collected from their respective APIs and by using plain screen data scraping. Local data were updated once a day, and queries were possible to be made over this data.

2016
